**Subject:** Virtually final Stormwater Program Monitoring Improvement Workshop Report  
**Attachments:** Improving Stormwater Program Monitoring Draft FINAL 10.5.18.docx

Thanks to all for providing your thoughts and powerpoints for the upcoming sessions at CASQA-Riverside. I am really looking forward to it. I am attaching the 99% final version of the report for the 2<sup>nd</sup> workshop we did in March. I hope that in our second CASQA panel we can try to convey what we did in this workshop and what we recommended as followup to help spur discussion with our CA colleagues on where to go from here. I really appreciate the comments received on the draft report from 4 of you, and about 6 other reviewers. We made extensive changes in the report to address these comments, and I hope they go over well. I just sent this version to PG Environmental for final proofreading, a little formatting work, and final "typesetting". I expect to get the "final final" early to mid next week. I will then email it to everyone I can think of, including you. We will soon post this report and the one from the first workshop on our website.

This was a hard report to write as we did not arrive at super crisp findings and recommendations at our Oakland meeting. That said, I believe the report may help advance the conversation about how we need to rethink monitoring, evaluation, tracking and reporting to yield more useful, cost-effective information and wisdom, and help guide us on some ways to improve in this regard.

Many thanks again. I am around next week if we need to discuss the panels more. But I trust all of you to do a good job telling story, getting people riled up, and helping us get to a productive conversation with these folks.

Have a fine weekend.  
Dave
